Series Moonlight Z

SUSPENDED

Moonlight is a project of Daniel Becker - a Berlin designer who creates innovative concepts and designs for lighting, furniture, as well as exhibitions and consumer products. Moonlight was inspired by the lunar eclipse. The name of the luminaire is also derived from this phenomenon. Moonlight Z luminaires are a version of the luminaire with a base and a 1.5 meter cable.

TO DOWNLOAD: 

Focused lighting with indirect light is perfect for restaurants, galleries, clubs, hotels, showrooms, studios and residential interiors.
